

How to Fold a Paper Airplane

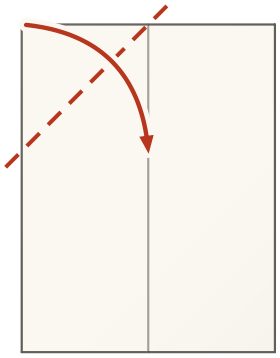

Easy level, 10 steps. Traditional. Earliest record: The European Magazine, 1786.

Every fold is animated at orikatado.com/paper-airplane

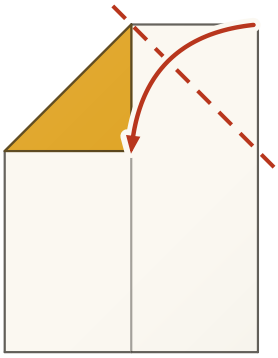

Valley fold: toward you Mountain fold: away from you

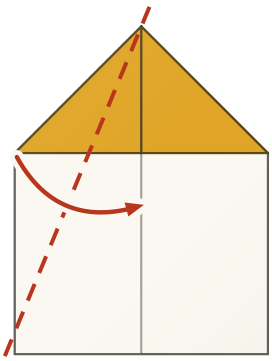

1 Fold the sheet in half the long way, then unfold.

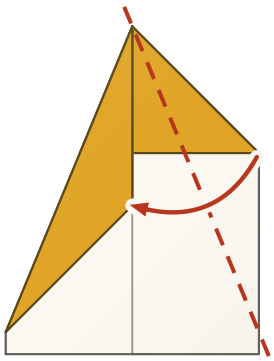

2 Fold the top left corner to the center line.

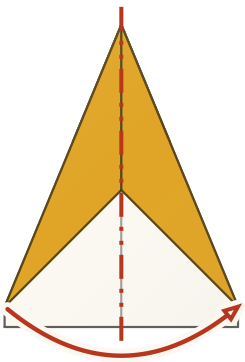

3 Fold the top right corner to the center line.

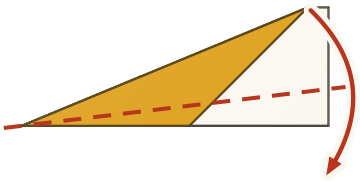

4 Fold the left slanted edge to the center line.

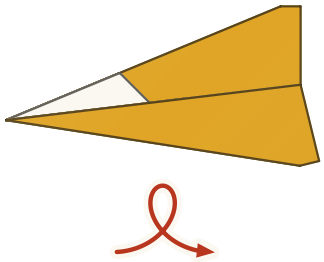

5 Fold the right slanted edge to the center line.

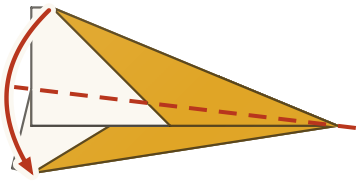

6 Fold the plane in half behind, along the center line.

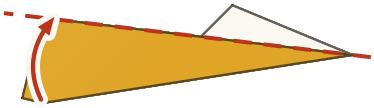

7 Fold the front wing down.

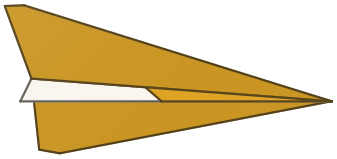

8 Turn the plane over.

9 Fold the other wing down to match.

10 Lift both wings until they are level.

Done Hold the plane under the middle and throw it gently, nose first.
