

How to Fold an Origami Three-Cornered Note

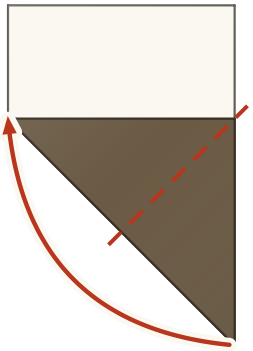

Easy level, 6 steps. Traditional. Earliest record: a letter of 1826 (Folger Shakespeare Library).

Every fold is animated at orikatado.com/three-cornered-note

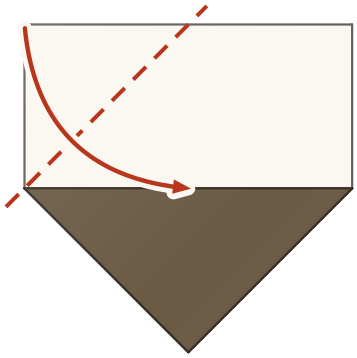

Valley fold: toward you Mountain fold: away from you

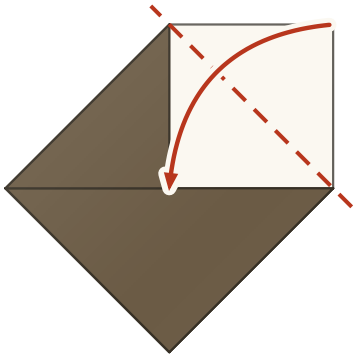

1 Start with a letter half again as tall as it is wide. Fold the bottom left corner up to the right edge.

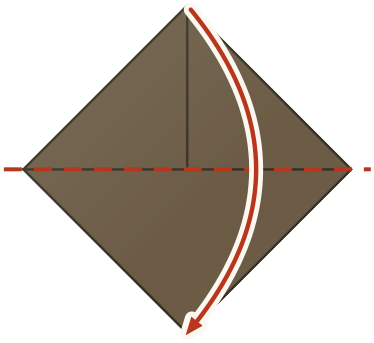

2 Fold the bottom right corner up over the triangle, so the bottom becomes a point.

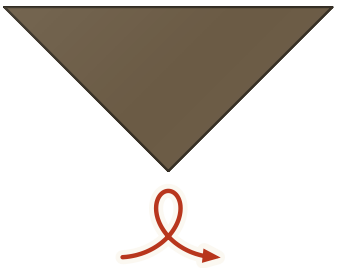

3 Fold the top left corner down.

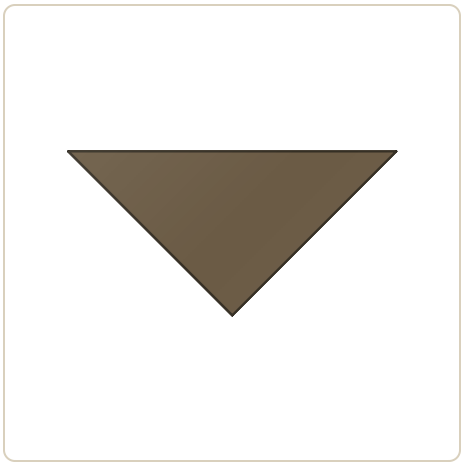

4 Fold the top right corner down. The top is now a point too.

5 Fold the top point down and tuck it into the pocket of the lower triangle.

6 Turn the note over.

Done The three-cornered note. Write the address on this side.
