

How to Fold an Origami Waterbomb Base

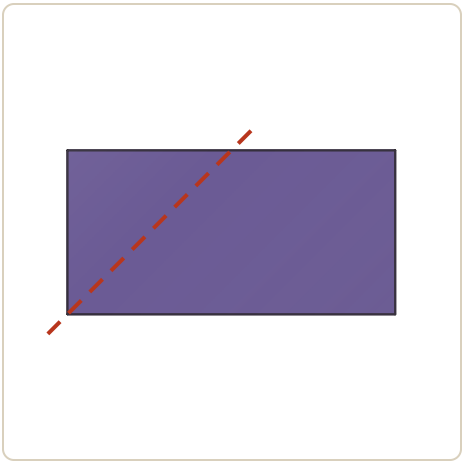

Easy level, 5 steps. Traditional base. Earliest record: Li Tre Trattati (Giegher), 1639.

Every fold is animated at orikatado.com/waterbomb-base

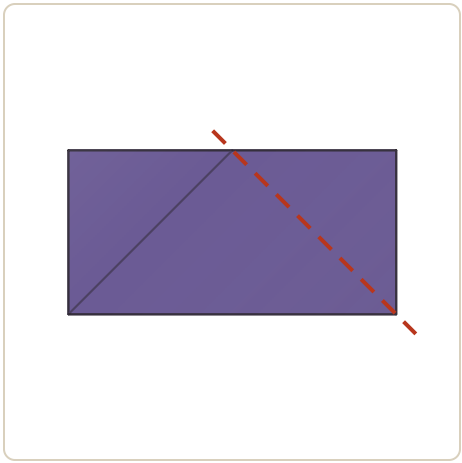

Valley fold: toward you Mountain fold: away from you

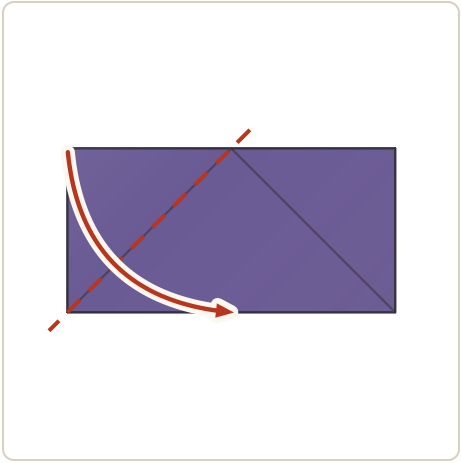

1 Start white side up. Fold the top edge down to the bottom edge.

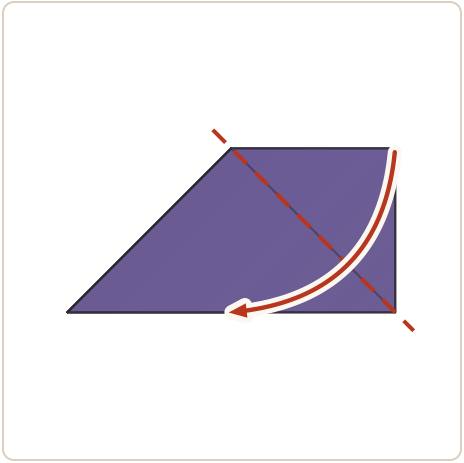

2 Fold the top left corner down along the diagonal, then unfold.

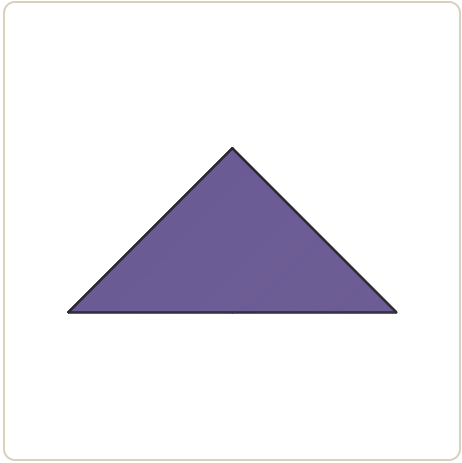

3 Fold the top right corner down the same way, then unfold.

4 Push the left corner in between the layers along the crease. This is an inside reverse fold.

5 Push the right corner in the same way.

Done This triangle is the waterbomb base. The waterbomb, the jumping frog and the tulip start here.
